RWSE's gain on Peptides-func does not grow with less data or shrink with depth
A · training-set size
verdict: absent
B · depth, residuals on
verdict: absent
C · RWSE walk length
verdict: inconclusive
RWSE gain in test AP (RWSE − no PE), 95% CI

measured RWSE gain, 95% CI
preregistered prediction at that point: H-size, at least this (A); H-reach, at most this (B: 0.5·g(3 layers); C: 0.5·$\hat{\Delta}_0$)
